

ONLIM

Empowering Enterprises to Unlock the Full Potential of AI – Automating Processes, Reducing Costs, and Driving Innovation.

Alexander Wahler
31.5.2025

The Problem

Enterprises Struggle to Leverage AI for Growth

Lack of Expertise:

Limited in-house knowledge and skills to implement and scale AI effectively.

High Development Costs:

Internal AI development is time-intensive, costly, and requires specialized expertise.

Data Silos and Complexity:

Fragmented data hampers the creation of a unified AI knowledge base.

Limited Tools and Infrastructure:

Existing tools are often too complex or insufficient for seamless AI integration.

Missed Opportunities:

Without AI, businesses forgo automation, cost savings, and innovation.

The Solution

Onlim: Revolutionizing AI Implementation

Centralized Knowledge Base:

Unifies enterprise data into a dynamic AI-driven knowledge graph, enabling natural language information retrieval for internal and external users.

Hybrid AI:

Merges Symbolic AI (Knowledge Graphs) and Generative AI for intelligent automation and contextual decision-making.

User-Friendly Tools: Low-code/no-code platform simplifies AI deployment, reducing dependence on technical expertise.

Seamless Integration: Easily connects to enterprise systems and third-party apps via APIs for smooth workflows.

Scalable & Secure: Enterprise-grade scalability with robust GDPR compliance and data privacy features.

What sets us apart

A Hybrid AI Platform Built for Real Enterprise Needs

Combines large-scale knowledge bases with conversational AI.

Complements enterprise data with cutting-edge automation.
